Zamani | GRILL & MARKET

# What Faisel needs from you to switch on the new website

The site is built. These are the logins, numbers and photos that turn it into a working store. Tick each one as it is handed over.

**Sharing logins safely.** Best: add Faisel as a user or manager inside each account instead of sending a password. If a password must be shared, say it on a phone call or a WhatsApp voice note, never by email or text.

## 1 · Website & domain access

- ◯ **GoDaddy access for zamanigrill.com**
  Add Faisel as a delegate (Account → Delegate Access), or share the login. This points the domain at the new site.
  `godaddy.com → Account settings → Delegate access`

- ◯ **Hostinger access for zamani2market.com**
  The second domain will forward to the Riley Fuzzel page.
  `hostinger.com → hPanel`

- ◯ **Old WordPress admin logins (both old sites)**
  To archive anything useful and shut them off cleanly.
  `zamanigrill.com/wp-admin · zamani2market.com/wp-admin`

- ◯ **Business email: which addresses exist on @zamanigrill.com, and where email is hosted**
  GoDaddy, Google or Microsoft. Changing the domain's settings must not break email.

## 2 · Payments (Priority / MX Merchant)

- ◯ **MX Merchant portal login, or 20 minutes together with the nephew to log in**
  This is where we create the Payment Link the website uses to take card payments. Card numbers never touch the website.
  `mxmerchant.com → Settings → Payment Links`

- ◯ **Merchant ID, and your Priority representative's name and phone**
  So we can ask them directly for sandbox access and fee questions.

- ◯ **A photo of the register and the card machine**
  Tells us whether it is Clover, MX POS or a plain terminal, which decides how orders can reach the kitchen later.

- ◯ **One recent Priority monthly statement**
  To confirm the card fees the website's savings numbers are based on.

- [ ] Later: an API key from MX Merchant for automatic "paid" notices
  Not needed for opening day. The nephew can generate it with Faisel on a call.
  `mxmerchant.com → Settings → Applications / API → Add application`

## 3 · Google Business Profile, social and delivery apps

- [ ] Google Business Profile (Google My Business): add Faisel as Manager on both listings, Louetta and Riley Fuzzel
  Most important item on this page. It controls the hours, photos, name, phone, website and Order link people see on Google Maps and Search for both stores.
  `business.google.com → choose the listing → People and access → Add → faiselt@gmail.com as Manager`
- [ ] Which Google account (Gmail address) owns the two listings, and who holds its password and phone for sign-in codes
  If nobody knows, or a listing was never claimed, Faisel will request access and Google sends a code or a video-verification step that the owner must complete at the store.
- [ ] Any existing Google Ads, Yelp for Business or other listing accounts, and who set them up
  Old agency or directory accounts often hold wrong phone numbers; we need to close or correct them.
- [ ] Facebook page admin (facebook.com/zamanimarketgrill), and Instagram login if there is one
- [ ] DoorDash Merchant and Uber Eats Manager logins
  To correct menu and hours there and to download statements.
- [ ] One month of DoorDash and Uber Eats statements
  Shows exactly what the apps keep, so the pickup-ordering savings are real numbers.

## 4 · Facts to confirm

- [ ] Every menu price
  Faisel will print the new menu page; mark anything that changed since September 2025.
- [ ] Market products and prices to sell online
  About 20 items to start: meat by the pound, spices, pantry staples. The current list on the site is a placeholder.
- [ ] Riley Fuzzel store: the correct phone (832-791-5486 or 346-225-1042?) and opening hours. Is any hot food sold there?
- [ ] Louetta hours, plus holiday and Ramadan hours
- [ ] Catering rules: how much notice, delivery yes or no, how far, any fee
- [ ] Sales tax rate you charge (8.25%?)
- [ ] Legal business name for receipts and the website footer

## 5 · Orders and daily operation

- [ ] Which email and mobile number should receive online orders, and who watches it during service
- [ ] Pickup timing: how many minutes for an "ASAP" order, and the last order time before closing
- [ ] Optional: a kitchen printer or tablet for orders
  Orders arrive by email first; a printer can be added later.

## 6 · Photos and brand

- [ ] Logo files, the original design file if one exists
- [ ] Photos: both storefronts, the butcher counter, market aisles, the grill, the family
  Or pick a day for Faisel to come and shoot them.
- [ ] Read the Arabic version of the site and tell Faisel anything that sounds wrong
